## Resins

| Product                     | Description                                             |
|-----------------------------|---------------------------------------------------------|
| <b>Meracryl AB-104</b>      | Acrylic resin self-crosslinking                         |
| <b>Meracryl AB-511</b>      | Resin acrylic soft and good elasticity                  |
| <b>Meracryl AB-940</b>      | Acrylic resin for high physical resistance              |
| <b>Meracryl AE-613</b>      | Acrylic resin self-crosslinking and high solids         |
| <b>Meracryl AB-CBN</b>      | Polyacrylic dispersion for leather finishing            |
| <b>Meracryl AC-UGW</b>      | Compact water based                                     |
| <b>Meracryl Binder 89</b>   | Acrylic resin for impregnation                          |
| <b>Meracryl OSS Compact</b> | Compact finish system                                   |
| <b>Meracryl U-182</b>       | Acrylic resin for upholstery                            |
| <b>Meritan AB-MBA</b>       | Binder for finishing                                    |
| <b>Meritan Binder B-214</b> | Butadiene aqueous dispersion                            |
| <b>Merithane 5160</b>       | Urethane small particle resin                           |
| <b>Merithane 5162</b>       | Binder for leather finishing                            |
| <b>Merithane 5220</b>       | Soft urethane resin                                     |
| <b>Merithane 5760</b>       | Urethane small particle resin and excellent penetration |
| <b>Merithane 7238</b>       | Aqueous opaque polyurethane                             |
| <b>Merithane ADP</b>        | Aliphatic polyurethane adhesion promoter                |

## Pigments

| Product                              | Description                                                                                     |
|--------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>LMP Micro Pigment Dispersions</b> | Fine particle size pigment dispersion for lightly finished leather where coverage is a concern. |
| <b>LPF Pigment Products</b>          | Fluorescent pigment dispersions                                                                 |
| <b>LPH Dispersion Pigments</b>       | Concentrated aqueous pigment dispersions                                                        |
| <b>TP Pigment Products</b>           | High brightness and light resistance pigments                                                   |

## Metal Complex Dyes

| Product                      | Description                                                |
|------------------------------|------------------------------------------------------------|
| <b>Soratint Dye Products</b> | Liquid dyes with high lightfastness and bright dye effects |

## Auxiliary

| Product                       | Description                                                                                  |
|-------------------------------|----------------------------------------------------------------------------------------------|
| <b>Merafill Finish 398</b>    | Filler based on esters acids                                                                 |
| <b>Merafill Finish FP</b>     | Polymer for leather finishing                                                                |
| <b>Merafill Finish UG</b>     | Thermo plastic polymer for leather finishing                                                 |
| <b>Meritan Driver P</b>       | Penetrating agent for leather finishing.                                                     |
| <b>Meritan Finish Aux WAT</b> | Non-thermoplastic binder for leather finishing                                               |
| <b>Meritan Novac Driver</b>   | Aqueous surfactant penetrator, VOC free                                                      |
| <b>Meropol Binder CAS</b>     | Non-thermoplastic binder for leather finishing                                               |
| <b>Meropol Oil 200</b>        | Blend of animal and mineral oils for leather finishing                                       |
| <b>Meropol Oil SK</b>         | Non water soluble, synthetic neatsfoot oil, for finishing leather to create a rich oily feel |
| <b>Soratex TXL</b>            | Water repellent based fluorochemical                                                         |
| <b>Soratex XCS</b>            | Water repellent based fluorochemical                                                         |

## Waxes and Oils

| Product                      | Description                                                        |
|------------------------------|--------------------------------------------------------------------|
| <b>Meropol Finish Aux CO</b> | Auxiliary for leather finishing                                    |
| <b>Meropol Oil 202</b>       | Conditioning oil for pull-up leathers                              |
| <b>Meropol Oil 600</b>       | Conditioning oil silicone based                                    |
| <b>Meropol Oil 710</b>       | Thinner and extender oil conditioner                               |
| <b>Meropol Oil KCO</b>       | Special oil for waterproofing leathers                             |
| <b>Meropol Oil SI-515</b>    | Translucent, viscous paste-like conditioning oil                   |
| <b>Meropol WA-4107</b>       | Wax for pigments mix                                               |
| <b>Meropol Wax 400</b>       | Mixture of melted wax designed to provide a dark surface skin type |
| <b>Meropol Wax 550</b>       | Mixture of water resistant wax for melting                         |
| <b>Meropol Wax 660</b>       | Auxiliary for use in base and top coats                            |
| <b>Wax WA-651</b>            | Hot melt wax mixture for water-resistant pull-up leathers          |
| <b>Wax WA-3787</b>           | Effects wax                                                        |

## Tops and Lacquers

| Product                | Description                        |
|------------------------|------------------------------------|
| <b>Merithane 7218</b>  | Aqueous matte urethane top         |
| <b>Merithane 8141</b>  | Aqueous bright urethane top        |
| <b>Merithane 8142</b>  | Aqueous semi-bright urethane top   |
| <b>Merolaq B-49</b>    | Auxiliary product for finishing    |
| <b>Merolaq Matt SW</b> | Matting agent for leather finishes |
| <b>Merolaq NC-62</b>   | Auxiliary for leather finishing    |

## Crosslinker

| Product                     | Description                     |
|-----------------------------|---------------------------------|
| <b>Sorapret Booster XLR</b> | Crosslinker polisocianate based |
| <b>Sorapret CLR</b>         | Auxiliary for leather finishing |

## Feel Modifier

| Product               | Description                                                           |
|-----------------------|-----------------------------------------------------------------------|
| <b>FA-24S</b>         | Feel modifier silicone based                                          |
| <b>Merafeel LV-03</b> | Promotes wetting and flow of aqueous finishes without generating foam |
| <b>Wax WA-280</b>     | Special blend of waxes and silicones                                  |
